Sub: A Report on Microcontrollers Workshop to IEEE Students Members – Reg

Micro controller workshop is the initiation taken by the 4th year IEEE student members of our student branch. The IEEE student members are conducting classes on every Tuesday, Thursday and Saturday for II and III years student members. So far 50 students have been registered for this training program. Under Micro controller workshop, the basics of microcontrollers, difference between microcontrollers and microprocessors, types of microcontrollers, various packages of microcontrollers, communication protocols, basics of C, bitwise operators and basics of embedded C are discussed in the workshop. In, coming sessions applications of MSP430 and Aurdino and practical sessions on different projects will be conducted.
